

Item 1

Claim 2
6.SP.B.5

SAMPLE	SCORE	RATIONALE
A	0	While this response demonstrates some understanding of the context and representation of the data, this student did not accurately enter ALL correct values into the table. This student inaccurately noted the turtle earned 11 1st choice votes instead of the correct value, 9.
B	0	While this response demonstrates some understanding of the context, it does not demonstrate understanding of the representation. The votes entered into the table only reflect the first (left) column of data for 1st and 2nd choice votes, with no consideration of the second (right) column of data provided.
C	0	While this response demonstrates some understanding of the context and representation of the data, this student did not accurately enter ALL correct values into the table. This student inaccurately noted the goldfish earned 7 2nd choice votes instead of the correct value, 8.
D	1	All values in the frequency table are correct. The student correctly interpreted the data table and entered all correct values in the frequency table. This response demonstrates understanding of the context and shows the student is able to both interpret the representation of the data and successfully translate it into a frequency table.
