

Item 1

Claim 2
6.EE.B.7

SAMPLE	SCORE	RATIONALE
A	1	The student gave the correct height of 28 cm.
B	0	Incorrect response.
C	0	Incorrect response. The student may have reasoned that since a stack of 4 cups has a height of 20 cm, a stack of 8 cups would be twice as tall, and therefore 40 cm.
D	0	Incorrect response. The student may have reasoned $16/2 = 8$ cm per cup, and then $8 \text{ cups} \times 8 \text{ cm/cup} = 64$ cm.
